ADJUSTMENT AND/OR RELOCATION OF UTILITIES

DESCRIPTION: The 4th paragraph of **Subsection 105.06; “Cooperation with Utilities,”** of the Standard Specifications, 2004 edition (page 1-33) addresses the situation whereby the adjustment and/or relocation of utilities is required by the Contract. All construction relating to new and/or existing electric and/or telephone facilities shall be performed by a contractor approved by the appropriate utility company, including all adjustments to manholes, frames and covers. If the Contractor has been pre-approved for such work by the respective utility, it may perform this work with its own forces. If the Contractor has not been pre-approved, it must retain a firm that has been so approved. The aforementioned Subsection also instructs the Contractor that prior to the pre-construction conference, it must submit to the Engineer written statements from the respective utility companies that the firm or firms that it has selected are approved for such work.

The only exception from submitting prior written authorization will be if the Contractor selects one or more of the following construction companies that have been pre-approved by the respective utilities:
