

**Notification to Abutters
Short-Term Response Action (STRA) Completion
Route 113 East Avenue (East Bound) Overpass at Interstate I-295/I-95
Warwick, Rhode Island**

February 13, 2026

In accordance with the Rhode Island Department of Environmental Management's (RIDEM's) Rules and Regulations for the Investigation and Remediation of Hazardous Material Releases (the Remediation Regulations), Verdantas LLC is providing notice to abutters on behalf of Rhode Island Department of Transportation (RIDOT), that a Dig & Haul Response Action for the above-mentioned property has been completed. The property is further designated as Route 113 East Avenue (East bound) Overpass at Interstate I-295/I-95 in Warwick, Rhode Island. The remedial action was performed in response to the discovery of elevated total petroleum hydrocarbons (TPH) concentrations in soil adjacent to the roadway, during the pre-construction Soil Classification Program. The impacts appear to be the result of historical usage of the roadway. A total of approximately 200 tons of soil were excavated from the roadside shoulder. Post excavation soil sampling indicated no jurisdictional releases to soil remain within the excavation area. RIDEM has determined that the investigation has adequately assessed the nature and extent of the contamination at the property and addressed all concerns in accordance with the Remediation Regulations.

Any questions or concerns regarding this notice may be submitted to the Department in writing to the address or email address below or by calling the telephone number listed below:
