This data from RIDOT's weigh-in-motion system alerts the Department when overweight trucks cross the eastbound Washington Bridge. This precautionary tool provides RIDOT with real-time information on overweight trucks crossing the bridge. While the weight limit for trucks on the bridge is 80,000 pounds, trucks weighing up to 96,000 pounds may cross the bridge if they have a permit to do so. The chart records the number of vehicles exceeding the 96,000-pound permit weight limit. RIDOT is not structurally concerned with vehicles over the legal weight limit of 80,000 pounds and under the 96,000-pound permit weight limit. In the event that a truck weighing 140,000 pounds or more crosses the bridge, RIDOT will follow up with a visual inspection to ensure that the load did not affect the bridge.
